Zhejiang Kangleda New Energy Co., Ltd is located in Yueqing, which enjoys a good reputation of “China Electric City” in Zhejiang. Kangleda, founded in 1983, is one of the earliest enterprises which develops and manufactures water inlet solenoid valve and pulse valve in China, and also is the enterprise which first participated in the development of national technical standards for specialized solenoid valve of household washing equipment. After decades of hard work, We have possessed six production and testing assembly lines of solenoid valve, as well as one solenoid valve research office. We are with the capability to independently develop, produce, control in process and test comprehensively. Now we have developed to be a professional manufacturer of solenoid valve, and also make our company popularity and reputation rising constantly.

Kangleda main products include water inlet solenoid valve, pulse valve and solenoid electric valve. We have more than 200 kinds of solenoid valves are widely used in the production fields and equipment such as national defense, vessel manufacturing, agriculture and animal husbandry, gardening, washing appliances, solar water heater, water treatment and smart toilet etc. Our products are exported to Southeast Asia, Europe, America and other more than 20 countries and have established long-term cooperation with Panasonic, Dyson, Culligan, Angel, JOMOO, ARROW and other well-known brands, and also make our company popularity and reputation rising constantly.
